RAS Machine Access Box

The M2Me client installed on the remote operator's PC, tablet or smart phone connects to the M2Me server (cloud-based solution operated by Etic Telecom) to establish a secure connection (VPN) onto the machine. It also organizes in a simple way the remote sites to be maintained or monitored.

The M2Me\_Connect service offers a secure end-to-end connection.

A Machine Access Box (industrial VPN Router) connects the machine or the remote industrial equipment to the M2Me server in a simple and totally secure way.
